DETAILED ACTION

1. It is suggested that the phrase "The invention also provides the solid culture of Zang Zhi obtained by the incubation method, and the products processed therefrom and the use thereof" in the abstract be deleted in order to eliminate repetition.
 2. A new title is required that is clearly indicative of the invention to which the claims are directed. The following title is suggested: A method for obtaining solid culture of Zang Zhi (*Antrodia camphorate*).
 3. Claim 63 is objected to because of the following informalities: it is suggested that the phrase "1% of carbon dioxide" be amended to --1 vol% of carbon dioxide--.
- Appropriate correction is required.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claim 50 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of US Patent No. 6,740,517. Although the conflicting claims are not identical, they are not patentably

Art Unit: 3644

distinct from each other because claim 50 (narrower) of the application "anticipates" claim 1 (broader) of US Patent No. 6,740,517. Accordingly, the application claim 50 is not patentably distinct from the US Patent No. 6,740,517 claim 1, since the application claim 50 requires that the solid elements be recorded as weight percentages and the gaseous elements be recorded as volume percentages while the US Patent No. 6,740,517 claim 1 only requires the solid and gaseous elements be recorded as percentages. Thus it is apparent that the more specific application claim 50 encompasses the US Patent No. 6,740,517 claim 1. Following the rationale in *In re Goodman* cited in the preceding paragraph, where applicant has once been filed an application or granted a patent containing a claim for the specific or narrower invention, applicant may not then obtain a second application or patent with a claim for the generic or broader invention without first submitting an appropriate terminal disclaimer.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure as cited on PTO-form 892.
